# FOR CLEANING AND SANITIZING

Thoroughly detail-clean and sanitize entire facility, especially if it has been closed. Focus on high-contact areas that would be touched by both employees and guests. Do not overlook seldom-touched surfaces. Follow sanitizing material guidance to ensure it's at effective sanitizing strength and to protect surfaces.

Avoid all food contact surfaces when using disinfectants

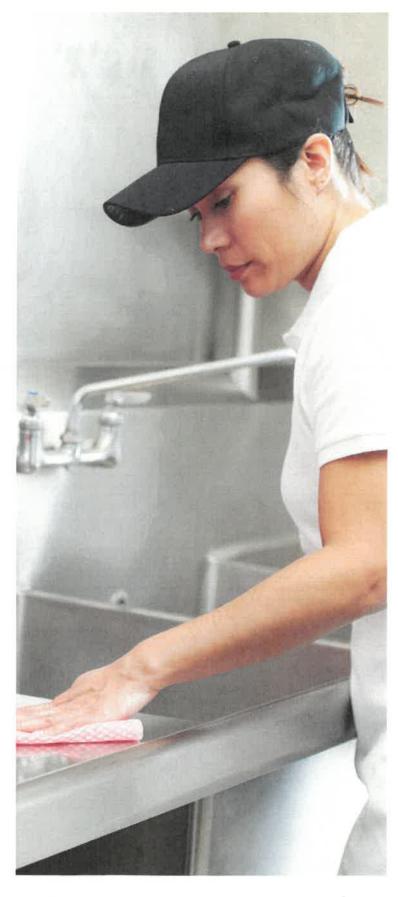

Setween seatings, clean and sanitize table condiments, digital ordering devices, check presenters, self-service areas, tabletops, and common touch areas. Single-use items should be discarded. Consider using rolled silverware and eliminating table presets.

Remove lemons and unwrapped straws from selfservice drink stations.

Clean and sanitize reusable menus. If you use paper menus, discard them after each customer use. Implement procedures to increase how often you clean and sanitize surfaces in the back-of-house. Avoid all food contact surfaces when using disinfectants.

**S** Check restrooms regularly and clean and sanitize them based on frequency of use.

Make hand sanitizer readily available to guests. Consider touchless hand sanitizing solutions.

## REOPENING GUIDANCE

# ON MONITORING EMPLOYEE HEALTH & PERSONAL HYGIENE

Per existing FDA Food Code requirements, employees who are sick should remain at home.

If an employee becomes ill or presents signs of illness, the operator should identify the signs during a pre-work screening and follow the business's established policies on when the ill employee is allowed to return to work. At a minimum, however, follow CDC guidelines – tell the employee to self-isolate for seven days from the onset of symptoms and be symptom-free for three days without medication.

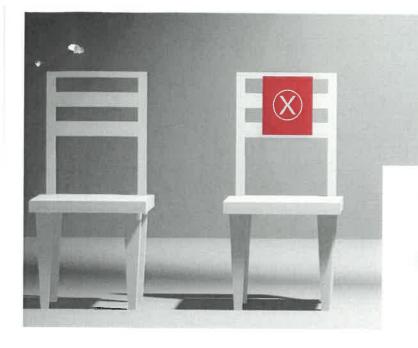

Taking employees' temperatures is at the operators' discretion. The CDC has not mandated taking an employee's temperature and any operator who chooses to do so should engage health officials first and adopt policies aligned with proper procedures. CDC guidance states the minimum temperature that indicates a fever is 100°F.

Per CDC recommendations, face coverings have been shown to be effective tools to mitigate risk from individuals who show symptoms as well as those who don't, especially in close environments where it's hard for people to maintain a three- to six-foot distance. In some states and local jurisdictions, face coverings are required by government officials; some employers require them, too. In all cases, those coverings worn by employees should be kept clean in accordance with CDC guidance. CDC provides overall cleaning guidance here.

Train all employees on the importance of frequent hand washing, the use of hand sanitizers with at least 60% alcohol content, and give them clear instruction to avoid touching hands to face.

- Update floor plans for common dining areas, redesigning seating arrangements to ensure at least six feet of separation between table setups. Limit party size at tables to no more than the established "maximums approved" as recommended by CDC or approved by local and state government. Where practical, especially in booth seating, physical barriers are acceptable. Consider a reservations-only business model or call-ahead seating to better space diners.
- Any social distancing measures based on square footage should take into account service areas as well as guest areas.
- Remind third-party delivery drivers and any suppliers that you have internal distancing requirements.
- Solution Post signage at the entrance that states that no one with a fever or symptoms of COVID-19 is to be permitted in the restaurant.
- Limit contact between waitstaff and guests. Where face coverings are not mandated, consider requiring waitstaff to wear face coverings (as recommended by the CDC) if they have direct contact with guests.
- If practical, physical barriers such as partitions or Plexiglas barriers at registers are acceptable.
- Use technology solutions where possible to reduce person-to-person interaction: mobile ordering and menu tablets; text on arrival for seating; contactless payment options.

- Provide hand sanitizer for guests to use, including contactless hand sanitizing stations, and post signs reminding guests about social distancing. Thank them for their patience as you work to ensure their safety.
- Try not to allow guests to congregate in waiting areas or bar areas. Design a process to ensure guests stay separate while waiting to be seated. The process can include floor markings, outdoor distancing, waiting in cars, etc. Consider an exit from the facility separate from the entrance. Determine ingress/egress to and from restrooms to establish paths that mitigate proximity for guests and staff.
- Where possible, workstations should be staggered so employees avoid standing directly opposite one another or next to each other. Where six feet of separation is not possible, consider other options (e.g., face coverings) and increase the frequency of surface cleaning and sanitizing.

**Note:** Face coverings may be required by government officials and/or restaurant operators to mitigate the distancing gap. If not mandated, face coverings are recommended by CDC and, when worn, they should be cleaned daily according to CDC guidance.

- Limit the number of employees allowed simultaneously in break rooms.
- With larger staffs, use communication boards to or digital messaging to convey pre-shift meeting information.

# BEST PRACTICES

FOR RETAIL
FOOD STORES,
RESTAURANTS
& FOOD/PICK-UP
DELIVERY SERVICES
DURING THE
COVID-19 PANDEMIC

FDA is sharing information about best practices to operate restaurants, retail food stores and associated pick-up and delivery services during the COVID-19 pandemic to safeguard workers and consumers.

This addresses key considerations for how foods offered can be safely handled and delivered to the public. This is not a comprehensive list. FDA encourages consulting the references and links provided below (by CDC, FDA, EPA, and OSHA) for more detailed information. This will be updated as FDA receives further information and inquiries.

- Managing Employee Health (Including Contracted Workers)
- Personal Hygiene for Employees
- Managing Operations in a Foodservice Establishment or Retail Food Store
- Managing Food Pick-Up and Delivery

### BE HEALTHY, BE CLEAN

- Employees Stay home or leave work if sick; consult doctor if sick, and contact supervisor
- Employers Instruct sick employees to stay home and send home immediately if sick
- Employers Pre-screen employees exposed to COVID-19 for temperature and other symptoms

- Wash your hands often with soap and water for at least 20 seconds
- If soap and water are not available, use a 60% alcohol-based hand sanitizer per CDC
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Wear mask/face covering per <u>CDC</u> & <u>FDA</u>

- Never touch Ready-to-Eat foods with bare hands
- Use single service gloves, deli tissue, or suitable utensils
- Wrap food containers to prevent cross contamination
- Follow 4 steps to food safety Clean, Separate, Cook, and Chill

### **CLEAN & DISINFECT**

- Train employees on cleaning and disinfecting procedures, and protective measures, per CDC and FDA
- Have and use cleaning products and supplies
- · Follow protective measures

- Disinfect high-touch surfaces frequently
- Use EPA-registered disinfectant
- Ensure food containers and utensils are cleaned and sanitized

- Prepare and use sanitizers according to label instructions
- Offer sanitizers and wipes to customers to clean grocery cart/basket handles, or utilize store personnel to conduct cleaning/sanitizing

### **SOCIAL DISTANCE**

- Help educate employees and customers on importance of social distancing;
- Signs
- Audio messages
- Consider using every other check-out lane to aid in distancing

- Avoid displays that may result in customer gatherings; discontinue self-serve buffets and salad bars; discourage employee gatherings
- Place floor markings and signs to encourage social distancing

- Shorten customer time in store by encouraging them to:
- Use shopping lists
- Order ahead of time, if offered
- Set up designated pick-up areas inside or outside retail establishments

### **PICK-UP & DELIVERY**

- If offering delivery options:
- Ensure coolers and transport containers are cleaned and sanitized
- Maintain time and temperature controls
- Avoid cross contamination; for example, wrap food during transport

- Encourage customers to use "no touch" deliveries
- Notify customers as the delivery is arriving by text message or phone call

- Establish designated pick-up zones for customers
- Offer curb-side pick-up
- Practice social distancing by offering to place orders in vehicle trunks
